

CL20 Interface frame

One of the biggest advantages of the CL20 Rear Cooler is its ability to couple with either a new build or a retrofit on to an existing cabinet.

The interface frame is a universal product, so all standard and some nonstandard enclosures can be accommodated. It allows a secure fixing of the rear cooler without transferring any additional weight to the existing cabinet.

The frame brings many of the benefits of the CL20 cooler family without the need to decommission old cabinets – or even entire data centres.

By working in harmony with the incumbent air conditioning system, many of the benefits of the **ColdLogik** system can be realised:

- Removal of hot spots.
- Increase cabinet kW density – and data centre density by housing more active equipment.
- Reduce carbon footprint.
- Save HVAC energy.
- Save energy costs.
